Owing to many vexed questions which have arisen recently among creditors of suspended firms, with regard to the consideration of deposited margins as assets, the Produce Exchange yesterday adopted a new rule which virtually decides the point for all future controversies. It is to the effect that in case either party to a contract, for the fulfilment of which margins have been deposited with the superintendent of the Exchange, shall die, make a general assignment, or otherwise become unable to perform acts which may be necessary for the proper adjustment of such contract, the Finance Committee shall ascertain the amount due and the persons to whom the margins should be paid, and then direct the superintendent to authorize the payments.

PENSIONS ASKED AS A RIGHT, NOT AS CHARITY.

The New-York State Association of Union Pri PENSIONS ASKED AS A RIGHT, NOT AS CHARIFY.

The New-York State Association of Union Prisoners of War has had presented in the House of Representatives, by Congressman Bliss, a bill in behalf of the survivors of Senthern multary prisons. The bill provides that these be paid a pension of \$5 a month for life, and \$2 for each day of confinement. In support of the bill the association arges that the survivors are so feeble and have such bad neath that they are unable to do a hard day's work; also that had it not been for the policy of the Federal Government, the exchange of prisoners of war would have been continued. References are made to the testimony in the rital of Wirtz, in the control of the War Department, to the letters of General Grant, and to the military reports, to prove that the suffering of the prisoners was far greater than the suffering of the prisoners was far greater than the exposure incidental to army life. On this ground the pension is easied, not as a charity, but as a right carned and justly due.

There were about forty in the Fifteenth Precinct Station, and about the same number at the Fourteenth, about half the number in each being women. The latter were mostly old, varying in age from fifty to eighty years. At the Fifteenth Precinct Station there was one young woman, Mollie Frazer. She was born near Boston. She came to this city a few years she then dressed richly, were diamonds spent money freely. Monday night had drifted so far from her

former state that she was obliged to go the police station and mingle with the old crones who could get lodging no where else. She submitted patiently to the operation of wacer east. Another said he was Dennis Kearney, that he had just arrived, but had unfortunately lost all his baggage and his money. Judge Van Hoesen recently sent to the Board of Health a letter complaining that foul doors came from a hot air register on the easterly side of the WHAT EVERY HORSE AND CATTLE OWNER WANTS

for all those painful complaints and weaknesses so common to

system for computing time allowances. The committee prescrited a report recommending a system of finding the sailing tonnage of a yacht, based on length and sail area. In the new system the length, multiplied by the sail area, divided by 4,000, gives the sailing terms, the length is the length on the water line, plus one-fifth of the overhang, multiplied by 9-10. The sail area is the lower sails, plus the top sails, minus one-fifth of the main-sail and foresail. Thus a yacht will be allowed to carry a topsail one-fifth the sail of its mainsail without being a topsail one-fifth the sail of its mainsail without being a topsail one-fifth the sail of its mainsail without being a topsail one-fifth the saile of its mainsail without being a topsail one-fifth the sailing "on the wind." This basis of computation for time allowances is different from any now in use. It was stated in the discussion, and generally admitted, that the system would favor vessels of the English cutter build. It was the general opinion, however, that the advantage given them is so slight as to be of no importance. After some discussion the report was adopted and a committee appointed to formulate a scale of time allowances from the recommended system.

There was considerable discussion in regard to the action of the Atlantic Yacht Club in fixing lis regarts for the 17th of June, after the Seawanhaka Club had set its on the same day. It is hoped that some arrangement may be made by which the holding of both regattas on the same day can be avoided. It was voted to change the name of the club from the "Seawanhaka Club had set its on the same day can be avoided. It was voted to change the name of the club from the "Seawanhaka Club had set and the day members of the organization. Thomas C. Back, Randolph Hurry, Arthur Mason Jones, Augusta P. Montant, S. THE LAST SENSATION.

Mr. William J. Smyth resides at No. 1,500 North Seventhst. Philadelpida Pean., and is well-known in journalistic circles. He writes: I had an attack of thermatism in both of my knee-joints, and for several days I was aimset crazed with the intense pain caused by the disease. To sleep was out of the question. I would like in bed all night awake, and the slightest motion then would produce such sharp pains in my knee-joints that I would actually scream out. I had to come down stairs one step at a time, and it was difficult for me even to like about the horne, and I found it impossible to attend to my business. Notking I could do relieved me of the intense pain, although I trued everything I heard of, but a friend came in one day, and said, "Why don't you give that St. Jacobs Oil a trial I' I resolved to, and sent out for a bottle. Almost as soon as I commenced rubbing with the Oil I felt a slight relief of pain and a peculiar tinging sensation in my knees, and the more I rubbed the better I got. By the time I had consumed two bottles I was entirely could walk time I had consumed two bottles I was entirely cured, and now have not aveatice of rhommatism and have not been I rubbled with it since I missined up that second bottle of st. Jacobs Oil.
